WHY TSG?

An Experienced, Skilled Workforce

From megasites to quick-turn, our 800+ Electricians and Technicians bring power and connectivity to projects of every shape and size. To scale our efforts, we also work with well-established partners across the country.

One Team, Seamless Integration

Our 100+ preconstruction, project operations, safety, and support professionals enable us to seamlessly integrate services such as Engineering, VDC, Prefabrication, Logistics, and Procurement, directly into projects.

Industry-Leading Safety

Our in-house Safety team is among the most robust and effective in our industry. In fact, our EMR, TRIR, and DART ratings are all well below industry averages.

SPOTLIGHT: MODULAR MANUFACTURING

At our Advanced Logistics + Manufacturing Facility (ALF), we're able to build, package, and integrate client-specific programs completely off-site. By completing an entire scope of work off-site, or simply maximizing the assembly of select parts, we can ensure that workflow is more efficient, more safe, and more accurate.

What We Can Build at ALF:

MEP Modules

MEP Conveyance

Electrical Skidding

Overhead Hangers

Multi-Trade Racks

Box Assembly

Fire Alarm Skids

Underground Modules

Ductbank Plates

Lighting

Conduit Bends

Cable Assemblies

- + Organized Workflows
- + Systematic Assembly Line Structure
- + Documented QA/QC
- + Full Testing Capabilities
- + Metal Fabrication
- + CNC Machining
